

Ekomaxi, in collaboration with Iconic Group company, presents a state-of-the-art solution for water storage with its GRP (Glass Reinforced Plastic) Water Storage Tanks. These tanks are designed to offer superior durability, hygiene, and performance for various residential, commercial, and industrial applications.

Key Features:

- **Durability:** Made from high-quality glass-reinforced plastic, Ekomaxi tanks are corrosion-resistant, UV-stable, and designed to withstand extreme weather conditions.
- **Hygiene:** GRP tanks ensure a hygienic water storage solution, free from contamination. Their smooth internal surface prevents algae or bacterial growth, making them ideal for storing potable water.
- **Customizable Sizes:** Available in a wide range of capacities, Ekomaxi tanks can be customized to fit the specific water storage needs of any project.
- **Lightweight and Strong:** Despite being lightweight, GRP tanks offer exceptional strength, making installation easier and more cost-effective.

Applications:

- Residential water storage
- Commercial buildings
- Industrial water storage and fire protection systems
- Agriculture and irrigation systems

Why Choose Us?

Choosing **Ekomaxi GRP Water Storage Tanks** means investing in quality, reliability, and innovative engineering, backed by the trusted expertise of the **Iconic Group**. Here's why we stand out:

* Unmatched Durability

Our tanks are made from **Glass Reinforced Plastic (GRP)**, ensuring superior resistance to corrosion, extreme weather, and UV exposure. This durability guarantees long-term reliability and lower maintenance costs.

*Hygienic Water Storage

We prioritize water purity. Our tanks are designed with smooth, non-porous interiors that prevent the buildup of algae and bacteria, ensuring safe storage for drinking water and other sensitive applications.
